

Welcome To iTech University Seminars Presented by iTech Tool Technology Inc...

# Power Tool Ergonomics

The art of Ergonomics

Learn how to improve your operator's productivity and safety when selecting industrial power tools:

- What is Ergonomics?
- Handle and Trigger Design
- Torque reaction in assembly tools
- Noise and sound levels (Process, Air Flow and Vibration Noise)
- Methods for reducing noise
- Learn about different ISO and international standards on vibration exposure

All participants will receive a pocket guide and certificate of achievement upon completion. **This seminar is approximately 45 minutes long and is presented free of charge by iTech Tools.** Seminar can be held onsite or at our head office in Winnipeg

## Research in Tool Vibration:

## Tool Handle Design to improve ergonomics
